Steps for Installation and Registration of Client: Java Phones

For 2.5 and above Generation Java phone Registration

Any MTNL postpaid or prepaid user can sign up for the MTNL Vault application through three different medium:

1. Registration through WEB
2. Registration through WAP (using phone device)
3. Registration through SMS command (Using phone device)

1) Register Through WEB:

Go to the MTNL Vault portal – <http://210.7.66.209/dolphin> and select your circle. Click on the MTNL Vault application link there. If subscribing first time for the MTNL Vault services click on New User Sign up button at the left of the screen.

What is Dolphin Vault ?

Dolphin Vault is a service that safeguards your mobile phone's Address Book, SMS, MMS, Photos, Videos, Ringtones, Wallpapers and Games - because you never know when your phone will be damaged, stolen or lost or you may like to change the phone. Dolphin Vault copies your data to a secure website and lets you restore them when you replace or upgrade your mobile phone.

Click on the location pointed by arrow to select you phone model

Select your phone model number from the drop down list of the phone devices.

The screenshot shows a Windows Internet Explorer browser window displaying the 'Dolphin Vaultt' website. The main content area is titled 'New user Sign Up'. On the left side, there is a login form with fields for 'User Name/MTNL' and 'Password', a 'Login' button, and links for 'Forgot Password' and 'New user Sign Up'. The 'New Users' section contains a 'Choose your phone model' dropdown menu. The dropdown is open, showing a list of phone models including Ericsson (T39, T39m, R520m, T85, T68), Motorola (A1200, C975, E680, L7, RAZR V3, RAZR V3i, V360, V3, V3i, V620), and Nokia (2610, 2626, 2855, 2865, 2865i, 3125, 3152, 3155, 3155i, 3220, 3230, 3250, 3300). The browser's address bar shows the URL 'http://192.168.3.209/dolphin/signup.jsp'. The Windows taskbar at the bottom shows the Start button, several open applications, and the system clock displaying 2:26 PM.

Click here.

The screenshot shows a Windows Internet Explorer browser window displaying the 'New user Sign Up' page for 'Dolphin Vault'. The browser's address bar shows the URL: <http://192.168.3.209/dolphin/signup.jsp>. The page content includes:

- User Name/MTNL:** [input field]
- (E.g. 919868012345)**
- Password:** [input field]
- Login** button
- Forgot Password** link
- New user Sign Up** link

The main content area is titled 'New Users' and contains the following text:

Dolphin Vault Backup with SyncML
You can enjoy an on-demand over the air backup of your phonebook by just configuring the SyncML application already on your phone. With Dolphin Vault(SyncML), you can:

- 1. Backup and Restore**
 - Phonebook:**
 - Manual backup of your phonebook
 - Messages (SMS/MMS):**
 - Forward your messages to 52585
 - Media (Photo/Video):**
 - Send your Photo/Video as MMS to 52585
- 2. Manage all your backed up data on this website.**
Phonebook changes made online will be backed up on your phone the next time you synchronize

On select SyncML phones, your phonebook is backed up without pressing a key at the scheduled time. On other phones, you can configure to synchronize the phonebook manually.

Note: You will need to be subscribed to GPRS

The browser's status bar shows 'Done' and 'Internet' with a 100% zoom level. The Windows taskbar at the bottom shows the 'start' button, several open applications, and the system clock at 2:28 PM.

Enter the information and click on Proceed

The screenshot shows a Windows Internet Explorer browser window displaying the Dolphin Vault registration page. The address bar shows the URL: `http://192.168.3.209/dolphin/register.do?phoneModel=Nokia3220`. The page title is "Dolphin Vault - Windows Internet Explorer". The main content area features a "New user Sign Up" section with a "Register" tab. The registration form contains the following fields and elements:

- User Name:** A text input field.
- Password:** A text input field with a "Login" button below it.
- Forgot Password:** A link.
- New user Sign Up:** A link.
- Register Form:**
 - First Name:** Text input field.
 - Last Name:** Text input field.
 - *Preferred Username:** Text input field.
 - *Mobile:** Text input field.
 - I have read and agreed to the [Terms and Conditions](#)
 - Proceed** and **Exit** buttons.

The footer of the page includes "© Copyright MTNL 2007" and the "Innovation" logo. The Windows taskbar at the bottom shows the Start button, several open applications, and the system clock displaying 2:35 PM.

You will receive a service message on the phone. Click on the link in the message to download the MTNL Vault application on your phone. Make sure your phone has active GPRS connection with proper settings (GPRS settings contact Customer Care).

2) Registration through WAP:

User can go to <http://210.7.66.209/dolphinwap> on the phone. User will find a link to subscribe to MTNL Vault application. Once user select a subscribe option, user will receive a service message to download the application.

3) Registration through Device:

A new user can send a simple text message from the phone device to subscribe for MTNL Vault service. User needs to send key word “PB” to short code “52585”. This message would be free of charge and user receives three messages from short code 52585.

1. Welcome Message
2. Instruction message
3. Service message to download the phone backup application.

Java Phone Backup FAQ's

General FAQ's:

What is special about MTNL Vault?

What is marvelous about MTNL Vault is that it is “automatic”: You don't have to remember to backup your data, yet the latest copy of your data is always available on the server. This is a lifesaver when you need it: if your battery dies, you lose your phone, or you don't have your phone with you but need a number.

How long does it take to activate my MTNL Vault connection?

Your MTNL Vault connection is normally activated as soon as you download and register the client.

Are there any special requirements to use this service?

In order to provide you with an exceptional service, there are a few special requirements:

GPRS/WAP enabled for your phone

Handset should have proper GPRS settings in the phone.

Is there a client or application that I need to install?

Yes, you have to download and install a java client on your phone. You can sign up to download and install this MTNL Vault application via <http://210.7.66.209/dolphin> website (click on “[New User Signup](#)”), MTNL's WAP site or by sending SMS “PB” to 52585.

Can I use my phone when MTNL Vault is running if I have a JAVA phone?

No. You will have to wait for synchronization to complete before you can exit the application and continue using your phone. If the synchronization process is interrupted, your data have not been backed up. Restart the synchronization again to ensure you have successfully backed up your data.

Why does application take long time to synchronize/backup the data, when backup is happening first time after initial download of the application?

When application is downloaded on the phone it backs up entire phone book on your web secure account. Application sends the contacts in small packets (having 20 to 50 contact-Number of contacts depends on strength of GPRS connection) to the server for backup. So application takes little more time while backing up the contacts first time.

Java Users: Signup for the service

There are 3 ways of signing up to the MTNL Vault service.

Via WEB

1. Click on “New User Signup” link on this website.
2. Follow the on-screen guide and input details about your phone model and details.
3. If the MTNL Vault application is supported on your phone, you will receive a Service Message on your phone from MTNL Vault for you to download the application on your phone to begin your backup.

Via MTNL WAP

1. Visit MTNL WAP site and click on MTNL Vault icon.
2. You will be informed the type of backup type supported on your phone and instructed on how to signup and activate the service.

Via SMS

1. All users can send SMS “PB” to 52585.
2. You will be sent a Service Message with a WAP link from MTNL Vault.
3. If your phone is not GPRS enabled, send SMS REG to 52585 to signup as a Legacy user.

How do I transfer my data to a new phone for Java phone users?

If you’ve upgraded your phone and the new phone supports the MTNL Vault application, you can download the MTNL Vault application on your phone and change your backup type to an automated backup via the MTNL Vault application.

To transfer your data to a new phone which supports MTNL Vault applications?

Via WEB

1. Login at the Existing User Login section on this website, and click on the Utilities > Restore link.
2. Select the Phone model

3. Click on the Restore button
4. A service message, with a WAP link will be sent to your new phone. Download and install the MTNL Vault application on your new phone.
5. The data will be automatically transferred to the new phone within a few minutes.

Via WAP

1. Visit the MTNL WAP Portal and click on MTNL Vault.
2. Click on Download MTNL Vault client to download the new MTNL Vault application
3. Follow the on-screen guide and click Yes to all prompts to install.
4. With the MTNL Vault application running on your phone, your data will be transferred to a new phone at your next sync action.

Via SMS

1. Send “Restore” to 52585
2. You will receive a Service Message from MTNL Vault with the WAP link to re-download the new MTNL Vault application on your phone.

3. At the MTNL Vault WAP page, click on Download MTNL Vault client to download the new MTNL Vault application
4. Follow the on-screen guide and click Yes to all prompts to install. You can choose to install the application on your phone or MMC.
5. With the MTNL Vault application running on your phone, your data will be transferred to a new phone at your next sync action.
6. Note: If the MTNL Vault Symbian or Java application is not supported on your phone, you will either be sent SyncML settings to configure your SyncML client or instructions on how to signup / backup as a Legacy user.

Whenever I try to backup any photo, video or download application asks me to press “OK” again and again? How do I change the settings?

After successful registration Go to Main “Menu>Application” and highlight MTNL Vault.

Now select

Options >>Application Access>>Phone Access>>Read User data>>Always Allowed

If this option is selected application will not ask the user’s permission to read the data from phone

After successful registration Go to main menu>Application and highlight MTNL Vault.

Now select

Options >>Application Access>>Phone Access>>Add and edit data>Always Allowed.

If this option is selected application will not ask the user’s permission to add and edit the data to phone.

How do I Stop/Unsubscribe the MTNL Vault service?

1. To stop the service,
2. Go to the Application on your mobile phone
3. Select MTNL Vault, and then Options > Remove

A message prompts up, click OK.

The application is now removed. You are however still subscribed to the service, and your data safely backed up on our server. You may choose to SMS “STOP” to 52585 unsubscribe from the service and effectively DELETE all your data.

Use the service while roaming

You can use the service if you have enabled GPRS while roaming. (Contact Customer Care, for GPRS related queries).

How do I Change my MTNL Vault password

To change your password for the service,

1. Go to the MTNL Vault application on your mobile phone
2. Click Options > Settings >General>Change Password
3. Type your old and new password.

4. Your password to MTNL Vault service is now changed. You will also receive a confirmation SMS on your Username and new Password.
5. Every time you login to the WEB/WAP, your new password will apply.

How do I restore my backed up data on a new phone number (New MSISDN)?

You can restore your backed up data on a new phone number. However, you can only maintain one phone number per MTNL Vault account.

You can restore data on a new phone number via SMS

Via SMS

1. Send NEWMN<space><userid><space><password> to 52585.
2. You will receive a confirmation SMS that your phone number has changed.
3. If your phone supports MTNL Vault Symbian or Java client, a service message with the application will be sent to your new phone. Download and install the MTNL Vault application on your new phone.
4. Enter your existing password.
5. The data will be automatically transferred to the new phone within a few minutes.
6. In future when you login to your data, your username will be your new phone number.

Contacts Backup

How do I backup my contacts?

MTNL Vault Java application is scheduled to synchronize your contacts every week. To manually initiate the synchronization of your phonebook entries,

1. Go to the MTNL Vault application on your mobile phone
2. Select Options > Backup > Phonebook
3. Synchronization progress bar is displayed, indicating that your phonebook is being backed up.

Change the schedule of contacts upload

You can change the schedule of contacts upload

1. Go to the MTNL Vault application on your mobile phone
2. Select Options > Settings > Phonebook
3. Under Synchronize every (the default setting is set to “7 days”) > Options > Change
4. Select the number of days, click Ok

This ensures that synchronization takes place according to your fixed schedule.

I want to manually choose when to upload contacts

You can change the settings to do manual uploads of your contacts.

1. Go to the MTNL Vault application on your mobile phone
2. Select Options > Settings > Phonebook
3. Under Mode (the default setting is set to “Scheduled”) > Options > Change
4. Select Manual, click Ok

This ensures that no contact is transferred until you manually choose to synchronize your phonebook. Whenever you want to synchronize your contacts, you can backup your contacts by selecting Options > Backup > Phonebook.

I added a contact on my phone, but I can't see it at Web (In my web account).

1 If those contacts are in your recycle bin, then those contacts will not upload.

How can I view my backed up contacts?

To view your backed up data,

1. Login at the Existing User Login section on this website, click on My Contacts
2. Your list of contacts is displayed

Photos and Videos

How do I backup photos and videos I take?

To backup your media (photo / video),

1. Go to the Phone Backup application
2. Click on Options > Backup > Media > Photos
3. Select the photos you want to backup from your phone
4. Click Options > Select/Unselect > Options > Backup
5. A confirmation message prompts up. Click Ok to backup
6. You will be prompted for an Album name. Select an existing album, or create a new album.

Note: The same procedure can be applied to backup videos

How do I backup photos or videos that are on my MMC?

To backup photos that is on the MMC,

1. Go to the MTNL Vault application
2. Click on Options > Backup > Media > Photos

3. The next screen shows two tabs. The default tab points to the Phone Memory. Select the next tab, which points to the MMC
4. Select the photos you want to backup from your MMC.
5. Click Options > Select/Unselect > Options > Backup
6. A confirmation message will prompt up. Click Ok to backup
7. You will be prompted for an Album name. Select an existing album, or create a new album
8. You can also choose Options > Select All to select all the photos in the MMC

Note: The same procedure can be applied to backup videos

What happens when I delete a photo or video on my phone?

Photos or videos that have been backed up to your MTNL Vault server stay there until you delete it via a WEB or WAP browser. Photos and videos that are deleted on your phone do not result in them being deleted on the server.

How can I view my backed up media (photo/video)?

To view your backed up data,

1. Login at the Existing User Login section on this website, click on My Media
2. Your list of albums with the photos/video is displayed

Download's Backup

What type of downloaded contents can I backup?

MTNL Vault Java Client supports backups of

1. Ringtones
2. Wallpapers

How do I backup downloads that are already on my phone?

To backup downloads that is on the phone,

1. Go to the MTNL Vault application
2. Click on Options > Backup > Downloads > Ringtones
3. Select the downloads you want to backup from your phone
4. Click Options > Select/Unselect > Options > Backup
5. A confirmation message prompts up. Click Ok to backup

Note: The same procedure can be applied to backup wallpapers

What happens when I delete a downloaded content on my phone?

Data that have been backed up to your MTNL Vault server stay there safely. Downloaded contents that are deleted on your phone do not result in them being deleted on the server.

How can I view my archived downloads?

To view your archived downloads,

1. Login at the Existing User Login section on this website, click on Downloads
2. Your list of downloaded content archive is displayed

SMS / MMS

How do I backup an SMS?

MTNL Vault Java application does not support backup of your messages. To backup an SMS / MMS

1. **SMS Backup:** Go to your message on your phone, forward it to 52585. You will then receive a confirmation SMS for successful SMS Update.
2. **MMS Backup:** Go to your message on your phone, forward to 52585. You will then receive a confirmation SMS for successful SMS Update.

How can I view my archived SMS?

To view your archived SMS

1. Login at the Existing User Login section on this website, click on My Messages
2. Your message archive is displayed

Starting and Stopping Application

What does “Running” mean?

This means that MTNL Vault is listening for changes that you make on the phone, ready to transfer these changes to the server.

If I stop MTNL Vault, do I lose my stored data?

As long as you are subscribed to MTNL Vault service, your data is stored safely. In the event that you do not have enough credits for your monthly subscription fee, your account is disabled, and your data is deleted shortly thereafter.

How do I restart MTNL Vault?

To restart MTNL Vault, select the application icon on your phone menu, and click on it. When you open the application, it automatically restarts.
